More Marine
SUPERYACHT

More Marine has been specialized in the superyacht industry since 1995.

With a dedicated team we supply Dutch superyacht yards like Feadship, Hakvoort, Oceanco, Icon and Amels.

We make direct supplies with fast deliveries to superyachts throughout Europe and supply the greatest superyachts on the water.

For over 25 years we have been focussed on knowledge, advise and quality products with good communications and fast response.

Located just outside of Amsterdam we easily ship with UPS to every yard or marina in Europe within a few days, or even sooner if needed.

CONTENTS

Mooring lines
Modern lines in Polyester and Dyneema

NFC Technology
All details of your lines on your phone

Inflatable fenders
Light, strong and reliable

Fender hooks
Quality custom hooks for caprail or bullwork

Tender whips
Practical way for mooring tenders or jet-skis

Chafe-Pro
Protect your ropes and yacht

Gill
High performance clothing

Spinlock lifejackets
Great comfort and safety

Line throwers
Rope accessories to complete your mooring package

Special projects
Custom guard wires, tylaska and various lines

MOORING LINES

Every yacht needs a different rope

As the standards on board of superyachts are way higher then on normal vessels, you need absolute quality, super materials and excellent workmanship.

Being specialist and supplier for the best superyacht builders for over 25 years, we can advise and supply you with lines made to fit your requirements and high standards.

Yachts 40 to 180 meter

We offer Polyester and Dyneema ropes for superyachts of 40m – 180m with short lead times throughout Europe. With those 2 materials we can supply the best rope that fits your needs. Whether you are looking for the best price, or for the best technical quality rope

Polyester and Dyneema lines

Yachts 40 to 80 meter will typically use Polyester; the longevity is great, and it provides good stretch.

Yachts over 80 meter will benefit more from Dyneema lines, with almost double the strength in the same diameter as Polyester. This allows a significant reduction in diameter and weight

M-ROPES

NFC

We use NFC tags in all our mooring lines in order to check all data of the rope including certificate number.

Within seconds after scanning all the mooring line details will pop up on your screen.

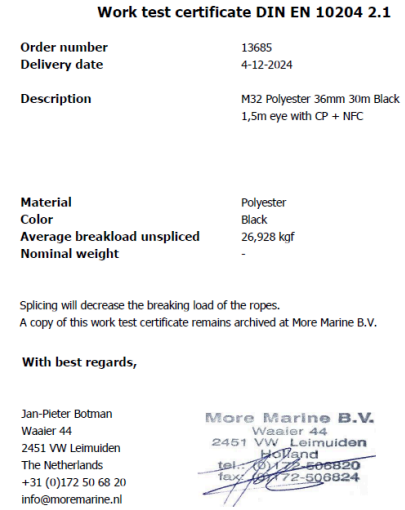

Whippings

Color coded whippings make identifying lines quite easy.

We can think of something for you or do it to your system.

Standard on all lines.

Work test certificate DIN EN 10204 2.1

Order number	13685
Delivery date	4-12-2024
Description	M32 Polyester 36mm 30m Black 1,5m eye with CP + NFC
Material	Polyester
Color	Black
Average breakload unspliced	26,928 kgf
Nominal weight	-

Splicing will decrease the breaking load of the ropes.
A copy of this work test certificate remains archived at More Marine B.V.

With best regards,

Jan-Pieter Botman

Work Test Certificate

Every mooring line comes with a certificate matching the NFC tag.

Also will we include an inspection manual.

This way our lines are conform the latest regulations.

HMPE / Dyneema tow lines

With a bright yellow colour it is easy to identify if the tow line becomes slack or when it comes under tension.
For that reason, our standard colour for tow lines is yellow.

Available from 2 to 100mm.

DOUBLE BRAID POLYESTER

diameter Ø mm	weight (kg/100m)	break load (kgf)
30	68	19.000
32	76	21.500

Tow line set-up

Towing System Y combines strength and reliability with premium components:

- **Polyester Bridle:** for excellent shock absorption.
- **HMPE Towline:** for lightweight durability and low stretch.
- **Tylaska Shackle:** for unmatched strength and ease of use.

Towing System Y-Y is a durable solution for secure towing:

- **Polyester Bridle:** Strong, flexible and wear-resistant for secure tender attachments.
- **HMPE Towline**: Lightweight, ultra-strong and abrasion-resistant for reliable towing.
- **Optional Tylaska Shackle:** Quick-release and high-strength for added convenience.

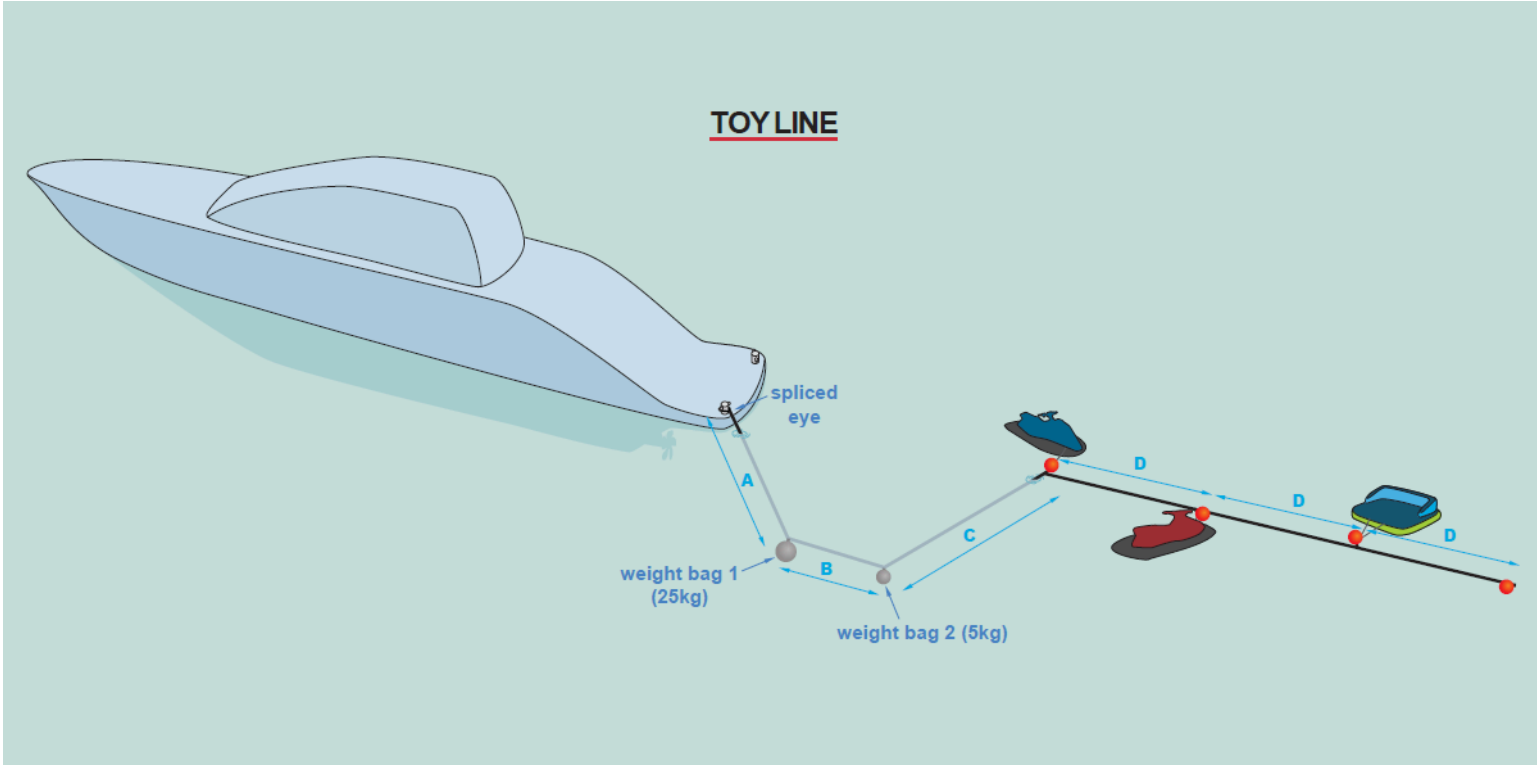

Toy line set-up

Toyline: Flexible, Efficient, and Customizable

The Toyline is built for high efficiency, featuring adjustable dive weights for optimal performance in various conditions. Fully expandable and customizable, it can be tailored to your specific needs.

A dedicated space for a tender is located at the stern, while lead lines ensure stability and protect engines during use by keeping the system submerged.

Experience the perfect balance of efficiency, flexibility, and protection with the Toyline.

INFLATABLE FENDERS

Inflatable fenders

Inflatable fenders are a perfect solution for superyachts. They require very little storage space and are very light-weight.
Inflating and deflating is very easy with quick action valves which also allow for a permanent open position. Furthermore they are easy to clean, long lasting and can have changeable fender covers.

Materials to choose from

We offer three different materials, PVC, Hypalon and Polyurethane. Each has is own strength to give you the best possible choice.

Lightweight | Long lasting | Hypalon option

fendequip

PVC Fenders

One of the most commonly fenders used is PVC. They can have welded or glued seems and are the most economical option.

Not as long lasting as Hypalon or Polyurethane but a true do it all fender for a great price.

Hypalon Fenders

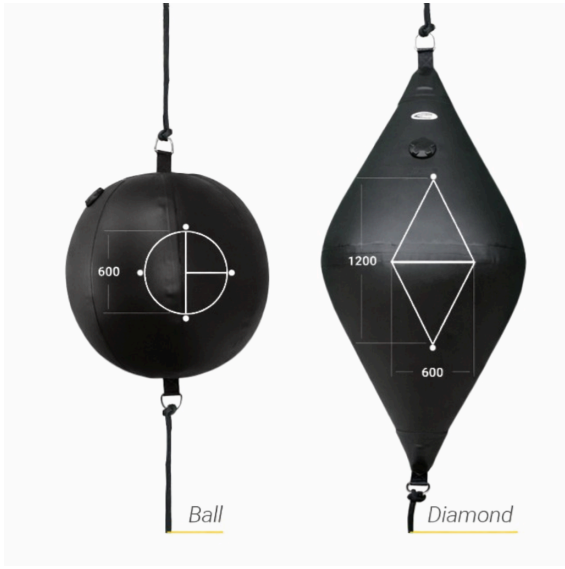

Available in several colours maxiStow Hypalon inflatable fenders are manufactured from highest quality 1500gsm/1670 Dtex Hypalon fabric which is extremely hard wearing.
The UV resistant properties ensure a long and trouble-free life.

Polyurethane Fenders

Inflatable fenders manufactured from Polyurethane is renowned for being the toughest commercial inflatable fender, ensuring that your superyacht is fully protected from all mooring and docking situations that may be encountered.

+31 172 5068 20 - info@moremarine.nl

Dayshapes

Lightweight dayshapes for easy storage.

All common shapes are available.

Garage fenders

Flat or inflatable garage fenders. With water ballast systems.

Made to requested lengths

Transom fenders

Solid foam transom fenders with Hypalon protection and non-skid top surface.

Fully custom made

FENDER SIZE-CHARTS

PVC Fenders
Not as long lasting as Hypalon or Polyurethane but a true do it all fender for a great price.

Polyurethane Fenders
Polyurethane is the toughest commercial inflatable fenders available.

Hypalon Fenders
Hypalon fabric is extremely hard wearing.
The UV resistant properties ensure a long and trouble-free life.

Transom Fenders

Solid Foam Transom (Stern) Fenders

The stern of a yacht is one of the most exposed areas during tender operations and docking.

Solid Foam Transom Fenders protect swim platforms and transoms from impacts while maintaining the clean appearance expected on modern superyachts.

Custom made for every yacht

Each fender is custom built to match the exact shape of the yacht’s transom, ensuring optimal protection and a perfect fit.

The high-density foam core absorbs impacts while the durable outer finish is UV-resistant and designed for intensive marine use.

Practical and crew friendly

The modular design makes the fenders easy to position and handle. Optional features such as handles, rubbing strakes, steps or handrails can be added to improve safety and usability during tender operations.

Titanium Pillar Fenders

Titanium Pillar Fenders

Pillar fenders protect vulnerable areas of a yacht during docking and alongside manoeuvres.

Titanium Pillar Fenders provide reliable protection while maintaining the clean appearance expected on modern superyachts.

Lightweight and extremely strong

Manufactured from high-grade titanium, these pillar fenders offer exceptional strength while being significantly lighter than traditional stainless steel versions.
The bead-blasted finish provides a modern metallic appearance with excellent scratch resistance and durability in marine environments.

Custom made for every yacht

Titanium Pillar Fenders are custom built to suit the exact deck-to-water height and installation points of the yacht and can be supplied with inflatable or solid foam fenders for reliable docking protection.

FENDER HOOKS

Fender hooks

Fender hooks come in many different qualities, types and shapes.

We offer standard hooks which fit over cap-rails up to 70mm. For fender hooks which fit over bulwarks we always go for a custom solution.

After measuring you have the ability to exactly create a product which suits your needs.

Colour Options

MARINE Leather GRADE

MDURA
MARINE DURABLE FABRIC

Engraving

Easily identify the position of the made to fit fender hooks

Can be engraved to a system of your choice to match your current system

Multiple options

We can customize every fender hook to your wishes with:
- closed or threadless fairleads
- aluminium or SS cleats
- various colours of leathering and stitching
- kickouts or extenders to avoid the fendline touching the paintwork.

On site measuring

Care should be taken when measuring the fender hooks on board.
Although superyachts look perfectly shaped, quite often there is a slight difference in shape in various places.
Therefore we can come over on board to measure up every single position for the fender hooks to ensure the best possible fit.

CAPRAIL FENDER HOOKS

Chafe-Pro®
Don't Dock Without It !

For cap rails up to 77mm. The hook is locked in place by the fender line itself after folding the hook over the cap rail.

Sheep wool on the inside prevents scuffing or on slippery surfaces we can use our shoregrip material.

CHAFE-PRO

Keep your lines in good condition

With vessels getting larger demands placed on mooring lines get higher and higher.
Friction in and around fairleads create huge problems and easily melt covers, destroying a mooring line.

Having great anti abrasion chafe gear can increase the lifespan of a mooring or tow line.
Superb materials and excellent workmanship, we can supply you with anti-abrasion gear made to fit your requirements and high standards.

Chafe-Pro

For over 20 years Chafe-Pro have proven itself by protecting the lines of US coastguard and US navy, and now has found its way into the superyacht industry keeping the physical strengths but combined with great aesthetically aspects.

Megayacht series

Designed to protect against abrasion and chafe. This will extend the life of your expensive mooring lines, keeping you and the yacht safe.

The Megayacht series are constructed from multiple layers of heavy-duty Nylon to ensure a long lifetime.

Part number	Size
08-NH-02	25-34mm, 60cm
08-NH-03	25-34mm, 90cm
08-NH-04	25-34mm, 120cm
08-NH-06	25-34mm, 180cm
12-NH-03	36-60mm, 90cm
12-NH-04	36-60mm, 120cm
12-NH-06	36-60mm, 180cm

Wooly

Chafe-Pro Wooly is designed to prevent fender and dock lines from scuffing, paint gelcoat or teak decks on yachts.

They are made from the finest New Zealand sheep skins, as a result they are very soft and durable.

Part numer	Size
CPW-18	10-16mm, 45cm

Neoprene and corporate wear

Foul Weather Gear

Waterproof and breathable protection, built with XPLORE® 2-layer fabric and fully taped seams.

A fleece-lined collar, adjustable hi-vis hood and stowable face guard provide comfort and protection in demanding conditions.

Short Washdown Boots

Non-splip, non-marking razor cut outsoles for grip. Quick dry polyester lining. Removable cushioned inner soles for fast drying.

Voyager Jacket

Made using our exclusive XPLORE® 2-layer waterproof and breathable fabric.

Reverse-coil front zip with an internal storm guard. Zippered pockets for secure storage.

UV Tec polo

Made using ultra lightweight pique fabric and UPF 50+ protection.

Actively wicks moisture away from the skin.

SPINLOCK LIFEJACKETS

Spinlock inflatable lifejackets

If a life-jacket isn't easy and comfortable to wear, you'll not wear it at all which can be dangerous.

Spinlock has been known for many years to produce the most comfortable inflatable lifejackets on the market.
Designed with comfort as number one requirement, all lifejackets are created with the best materials. Shaped to make the user forget he or she is wearing a life jacket at all.

Spinlock's range of inflatable lifejackets include very lightweight deck-vests for children, adults, offshore sailing and SOLAS approved inflatable lifejackets. Available from 100N up to 275N.

Logo printing

All Spinlock lifejackets can be custom printed with an IMO number or boat name and logo.

Comfortable | Lightweight | one-size fits all

Lite lifejacket

Ideal for fast craft, RIBs, power and sail boating, paddle sport, fishing, and open power craft.

Compact one size fits all design, easy to put on or off and very lightweight.

Part number	Size
DW-LTE	one size fits all

Lift solid PFD

Specially designed for water sports

Compact, lightweight and colourful design has fast become the PFD of choice for people enjoying water sports.

Available in black and white

Part number	Size
DW-BA	s / m / l / xl

SOLAS lifejacket

The SOLAS lifejacket is shaped to fit without riding on your neck and not to interfere with additional fall-arrest harnesses.

The body is shaped and the lifejacket rest comfortably on your shoulders. A unique bladder shape lifts and supports the body higher when in the water. Fully SOLAS approved and certified.

Part number	Size
DW-SLS/A	one size fits all

LINE THROWERS

Line throwers

Leather sandbags are safe to use, don’t bounce on the dock and are easy to produce and replace.

Made of soft leather and a piece of webbing or stainless-steel insert for easy attachment of the heaving line without the risk of scratching with metal parts.

Throwing line

We supply our sand bags with an 8mm double braid with 30 meters of throwing line.

Leather sandbag

Different models available, all made from genuine leather and filled with 400 grams of sand.

Stopper lines

In house testing shows a 14mm 8-plaided polyester rope gives the best hold on most Polyester and Dyneema lines.

The 8-Plait construction is soft and flexible, and strong enough to safely use whilst still a very economical option.

SPECIAL PROJECTS

As rope specialist we can offer you all sorts of solutions. Our warehouse stocks ropes from 2 upto 44mm in various materials.

If you need something strong like Dyneema, or need something stretchy like polypropylene, we can surely help you out!

Wire rope

Dyneema railing lines for the foredeck. With custom finished stainless steel turnbuckles.
Soft to the touch, safe, light, and easy to store guard wire replacements.

Various ropes on spools

We supply ropes on spools, whipping twines and splicing accessories like Selma splicing kits.

Hoisting lines

For tender hoisting we provide the Geobend dyneema's in combination with Tylaska shackles. If needed we can supply certified lines.

Mooring Package

The Premium Mooring Package gives crew everything needed to create, repair and maintain professional mooring lines on board.

The kit includes polyester lines in 8, 10, 12 and 16 mm, uncovered HMPE lines in 8, 10 and 12 mm, and 6 mm black elastic cord. Line diameters and colours can be customised.

A complete splicing kit and battery-powered rope cutter ensure efficient splicing, cutting and sealing—all in one practical package.

Wichard package

The Wichard Hardware Package provides a carefully selected range of practical essentials for everyday use on board, keeping useful hardware organised and within easy reach.

Supplied in one convenient box, the kit includes an assortment of D-shackles in various sizes, multiple swivel snap shackles, plastic hooks, stainless steel hooks and one folding knife. The varied selection supports a wide range of fastening, securing and general deck tasks.

Certified padeyes complete the package and are also available separately.

Safety Rails System

The Ronstan Safety Rail System provides a secure and reliable fall-protection solution for crew working on deck.

The system consists of a precision track rail with sliding car assemblies, allowing users to move safely along the rail while remaining securely attached.

Designed for marine environments, the rail features stop holes at 50 mm intervals and mounting holes every 100 mm. The track is securely fastened using M6 mounting bolts, ensuring strong and reliable installation.

Certified fall protection systems tested to EN795:2012 Type D for single users and CEN/TS16415:2013 for multiple users.

Smooth and secure operation

The tandem sliding car assembly allows safe movement along the rail while remaining connected to personal safety equipment.

Each car features an attachment point for harness systems, while an integrated spring-loaded plunger allows the car assembly to be locked into position when required.

Flexible installation

The system can be extended by connecting multiple rail sections to achieve longer runs. Additional sliding cars can be added for tools or equipment, and rails and cars are available in black or silver anodised finishes to match the vessel's deck layout**.**

HAPPY CUSTOMERS

★★★★★ **5 star reviews on all recent projects.**

Chief officer, 110m motor yacht
We use the M-ropes mooring lines from More Marine in both polyester and dyneema. The deliveries were nice on time and we are excited about their service and knowledge.
When we damaged some covers in a storm they were able to repair and re-splice the ropes in short time.
Good communication and fast response makes it easy to work with them.

Chief officer, 80m motor yacht - Amels
I contacted More Marine to provide 36mm dyneema mooring lines and enjoyed the service so much that we had them supply various other items including lines for our tenders and chafe-pro accessories. I also had them work on some specific projects with their expertise and efficient service. I would highly recommend them.

Chief officer, 92m motor yacht
Great service and advice from More Marine. We purchased the 36mm Dyneema lines with stretchers and they do help with handling compared to thicker polyester lines. The delivery was received on time in Genoa and contacts at More Marine were always on hand to update.

Captain, 80m motor yacht
We recently purchased some 32mm dyneema mooring lines with More Marine. It saves a lot in terms of weight and boat handling and they look great!
More Marine advised us in the right way including chafe-pro protection and the use of stretchers as a shock absorber.

Chief officer, 65m motor yacht
We purchased Gleistein mooring lines from More Marine. The delivery was on schedule in Palma Mallorca, and ordering was very easy.

Chief officer, 54m motor yacht
We've replaced our mooring lines with the M-ropes polyester in 36mm.
The splicing looks good, and leather finishing and NFC chips are great.
Communications and shipment to Barcelona were easy and fast with
More Marine.
They have great experience with mooring lines and advised us the proper product for our yacht.

Chief officer, 45m motor yacht
We have been using the M32 polyester mooring lines for a while now and they still look great. More Marine supplied in time and had a good service. We haven't used the NFC tags yet but the idea is great to be able to keep track of the mooring lines in the future.

2nd officer, 61m motor yacht
We purchased mooring lines from More Marine and they are great to use. The delivery was right on time in Greece, and contact was easy and very helpful. I love new technology NFC on Each line - I always know which line is 25m 35 and 50m - very useful. I will use More Marine in future for sure.

Chief officer, 55m motor yacht
Very impressed with the service and the assistance from More Marine, always on hand with samples and went out of their way to complete task that was set out.
A beautiful set of Fenderhooks and Mooring Lines delivered.
